

# Keep your profile updated

The screenshot shows the 'Profile' page in the Transformable.app interface. The page is dark-themed and features a sidebar on the left with navigation options: Dashboard, Alerts, Apps, Servers, Providers, Domains, Apps Library, Account, and Support. The main content area is titled 'Account Information' and contains several input fields for user details: First Name (Formable), Last Name (Admin), Email (admin@formable.app), Phone (555-555-5555), Company Name (Enter company name), City (NSQ), Zip Code (55555), State (Pennsylvania), and Country (United States). An orange 'Update Profile' button is located below the form. Below the account information, there are two sections: 'Privacy Mode' with a toggle switch for 'Enable Privacy Mode' and 'Alert Notifications' with a link to 'Configure how you receive notifications for new alerts'. The bottom left corner shows the user's identity as 'Formable Admin' with the email 'admin@formable.app'.

## Account Information

It's easy to keep your account and contact information updated. Also if you set a Company Name, the interface will show your company name next to the logo in the top bar.

We rely on your Email for notifications and billing, please keep it current.

## Privacy Mode

Enable privacy mode to hide all IP addresses in the system from view.

## Alert Notifications

Choose how you receive notifications for new alerts in the app. Enable Browser notifications or use the built-in toast notifications instead.

- Toast Notifications: Show temporary messages in the app.
- Browser Notifications: Show system notifications even when the app is closed.

## Clear Stored Data

Clear local stored data including alert notifications, table sorting, and pagination preferences. This will reset all stored UI preferences and allow you to receive notifications for previously seen alerts.
